(54) Title: URINARY INCONTINENCE DEVICE

(57) Abstract: The invention relates to an external female incontinence device (13). The device (13) comprises a flexible elastic strip (1) having an opening (3) in the strip (1), a fluid collection means (4) surrounding the opening on one face, the strip (1) and opening (3) are sized and shaped so that when stretch fitted over the external urogenital organs the labia minor extends through the opening (3) and a fluid tight fit between the upper face of the strip and the flesh surrounding the labia minora is formed. The device (13) may further comprise a waistband (17) for attachment of the device (13) and to assist in maintaining a positive tension to press the device (13) against the flesh surrounding the labia minora.
